	PAGE
<b>Foreword</b>	iii
<b>PRINCIPAL THEME PAPER</b>	
Silting Problems in Hydro Power Plants — A Comprehensive Overview <i>Dr. B.S.K. Naidu</i>	1
<b>CATCHMENT TREATMENT AND RESERVOIR SEDIMENTATION</b>	
1. Silting of Reservoirs-Koyna Hydroelectric Project — A Case Study <i>R.L. Damani and A.P. Avhad</i>	1
2. Implementation of Catchments Area Treatment Plan in Sikkim, Himalaya <i>S.K. Dodeja and A.K. Tripathi</i>	9
3. Study on Starting Velocity of Cohesive Sedimentation <i>Dr. Zhang Landing</i>	22
4. Analysis and Appraisal about the Starting Law of the Sedimentation <i>Dr. Zhang Landing</i>	29
5. Sediment Problems in Storage Power Plants and Remedial Measures <i>M.G. Sharma, D.D. Das and J.D. Sharma</i>	35
<b>DE-SILTING AND SILT DISPOSAL</b>	
1. Dredging Problems in BSL Balancing Reservoir—A Case Study <i>Gopal Chauhan, B.N. Asthana and A.K. Sharma</i>	49
2. De-silting and Silt Disposal Arrangement from Beas Satluj Link Hydroelectric Project (990 MW) Constructed in Lower Himalayas in Himachal Pradesh (India) <i>S.K. Duggal and R.S. Dogra</i>	59
3. Design of De-silting Structures and Silt Disposal of Casecanan Multipurpose Project <i>Dieter R. Müller and Enrico G. Gregorio</i>	72
4. Desanding for Small Hydro-An Innovative Approach <i>A.K. Awasthi</i>	83
<b>MODELLING TECHNIQUES</b>	
1. Numerical Simulation of Flow Field and Sediment Concentration in Forebay <i>Ali Akbar Salehi Neyshabouri and Gholamreza Naser</i>	93
2. Remote Sensing Data Model for Estimating Sediment Delivery Ratio <i>D.C. Sharma and O.P. Dubey</i>	100
3. Design and Development of Model Test Facilities for Predicting Silt Damages <i>Dr. M. Ramamoorthy, G.N. Mathur, M.K. Das and Dr. M.K. Sharma</i>	107
4. The Exact Solution of the Vertical-axes Vortex and the Practical Interest <i>Dr. Zhang Landing</i>	115

## HYDRAULIC DESIGN CONSIDERATIONS

1. Cavitation Erosion Characteristics for Bell-Mouths of Pressure Spillways 121  
*Jit Narayan Nayak*
2. Hydraulic Design of a Francis Runner Profile Inherently Resistant to Silt Erosion 128  
*V.K. Pande and V. Shrinivas Rao*
3. Turbine Runners for Silty Water: Design/Selection Guidelines 136  
*M.B. Kashid, M.S. Shitole and V.K. Tripathi*

## MECHANICAL DESIGN AND MATERIAL TECHNOLOGY

1. Successful Design and Development of "Additional Repair Seal" at Site for Francis Turbines of 6 x 115 MW Salal Hydroelectric Project 147  
*Yogendra Prasad and Kamal Kapoor*
2. Improvements in Generating Units of Salal Hydro Power Station (6 x 115 MW) to Improvement Performance 159  
*S.P. Gupta and Kamal Kapoor*
3. Real Scale Performance of Advanced Erosion Protection Techniques on Water Turbines 168  
*Michael Engelhardt, Christoph Schneider and Dieter Oechsle*
4. Silting Problems in Hydro Plants and their Remedial Measures 176  
*D.K. Dhar*

## CASE STUDIES

1. Problems Encountered due to Erosion of Hydro Turbine Components Working in Highly Silty Environments-R&D Activities Directed towards their Life Extension 185  
*R.K. Sharma, G.N. Mathur and P.C. Manchanda*
2. Case Study – The Siltation Issue in the Cameron Highlands - Batang Padang Hydroelectric Power Scheme 196  
*Foon Shyong Wai and Ramli Bin Abdullah*
3. Determination of Optimal Sediment Size to be Excluded for Run-of-river Projects—A Case Study 206  
*B.N. Asthana, Gopal Chauhan and D.S. Verma*
4. Russian Experience in Design of Dam Projects on Rivers with Heavy Sediment Load 215  
*A.E. Asarin, A.K. Fink, A.M. Proudovsky and V.P. Seredavkin*
5. Silting Problem on O&M (An Experience of Reservoir Type and Run-of-river Type Powerhouses Constructed on Himalayan Rivers of Nepal) 222  
*Prem Kumar Mali*
