		Page
Foreword		(vii)
Keynote Address – *Gerhard Ziegler*		
SESSION I - STATION AUTOMATION		
1.	Technology Review – Integrated Protection and Control and Metering Systems – *Mukesh Nagpal*	I-1
2.	Distributed DSP Coupled with Precise Time Synchronization Allows Unprecedented Integration of Substation Automation and Control – *Bruce H. Roeder*	I-13
3.	Integration of Numerical Relays, their Remote Communication & Challenges Faced – Experience of Tata Power – *D.A. Sathe, M.V. Kini, M. Ravindran, C.R. Bhonslay and D.A. Joshi*	I-31
4.	Experience of Integrated Protection and Control Equipment for 11KV System at GNFC – *Rajiv Krishnan, Y.S. Venkatesh, R. Narayanan and Atul Gajjar*	I-39
5.	Integrated Protection and Control System for Industrial Application – *R.S. Mahajan*	I-45
SESSION II - STATION AUTOMATION		
1.	Expending the Scope of Protective Relays Across Traditional Boundaries – *G. Aldinger and G. Koch*	II-1
2.	Programmable Scheme Logic for Protection and Control Devices – *S. Richards, Graeme Lloyd and Ritesh Bharat*	II-7
3.	Evolution of Remote Terminal Units in Electricity Transmission and Distribution Networks – *Raj Balaji*	II-14
4.	Multiprotocol Lable Switching (MPLS) Technique for Accurate Data Acquisition in Large Interconnected Systems – *K. Bhaskar, G. Shanmugam and S. Badri Narayanan*	II-17
SESSION III - STATION AUTOMATION AND NOVEL SENSORS		
1.	Substation Automation – *Prashant D. Chitnis*	III-1
2.	Applications and Benefits of a New Generation of Combined Protection and Control Devices – *Hamid Syed, Rudolf Simon and Thomas Rudolph*	III-10
3.	Optical Sensors for Current & Voltage Measurement – *Chris Reinbold and Robert Vatsan*	III-18
4.	Opto-Electronic Sensor : New Concept for Analogue Measurements in Electrical Substations – *E. Legrand and Ritesh Bharat*	III-31

SESSION IV - COMMUNICATION FOR PROTECTION AND CONTROL

1. Application of High-Speed Peer-to-Peer Communications for Protection and Control
   – *A.P. Apostolov and Ritesh Bharat* IV-1

2. Communication Technology in Substations - Actual Developments from the View of Testing
   – *Fred Steinhauser and Manish Gupta* IV-12

3. The Communications Standard IEC 61850 Supports Flexible and Optimised Substation Automation Architectures
   – *Lars Andersson, Klaus-Peter Brand and Wolfgang Wimmer* IV-17

4. Some Aspects of Migration from Present Solutions to SA Systems Based on the Communication Standard IEC 61850
   – *Lars Andersson, Klaus-Peter Brand and Wolfgang Wimmer* IV-24

5. Wide-band Communication for Transmission Line Relaying
   – *H. Hupfauer and G. Koch* IV-34

SESSION V - TESTING OF RELAYS AND SCHEMES

1. Testing Numerical Relays - Alternative Techniques and a Laboratory Implementation
   – *M.S. Sachdev and T.S. Sidhu* V-1

2. Efficient Type Testing of Digital Protection Relays
   – *Steffen Kaiser and Reinhard Kuntner* V-7

3. Remote Controlled Testing of Communication Schemes for Power System Protection Using Satellite (GPS) Synchronization and Modern Communication Technology : A New Approach
   – *Zeljko Schreiner and Reinhard Kuntner* V-14

4. Modelling Relays for Use in Power System Protection Studies
   – *M.S. Sachdev and T.S. Sidhu* V-26

5. Experiences with Field Testing of Protective Relays
   – *P. Kaliappan, Vanishree Samuel, A. Amruthakala, V. Arunachalam and V.N. Nandakumar* V-32

SESSION VI - OVERALL POWER SYSTEM PROTECTION DISTURBANCE ANALYSIS AND FAULT LOCATION

1. Wide Area Protection Solution for Enhancing Power System Security and Performance
   – *Mehmet Kaba and Joachim Bertsch* VI-1

2. Absolute Phase in Power System Applications
   – *Bruce H. Roeder* VI-9

3. Fault Location on Parallel Transmission Lines with Series Compensation
   – *M.M. Saha, K. Wikström, J. Izykowski, E. Rosolowski* VI-20

4. A Scheme for Accurately Locating Transmission Line Faults Including the High Impedance Ones
   – *R.N. Mahanty and P.B. Dutta Gupta* VI-30

SESSION IV - COMMUNICATION FOR PROTECTION AND CONTROL

1. Application of High-Speed Peer-to-Peer Communications for Protection and Control
   – *A.P. Apostolov and Ritesh Bharat* IV-1

2. Communication Technology in Substations - Actual Developments from the View of Testing
   – *Fred Steinhauser and Manish Gupta* IV-12

3. The Communications Standard IEC 61850 Supports Flexible and Optimised Substation Automation Architectures
   – *Lars Andersson, Klaus-Peter Brand and Wolfgang Wimmer* IV-17

4. Some Aspects of Migration from Present Solutions to SA Systems Based on the Communication Standard IEC 61850
   – *Lars Andersson, Klaus-Peter Brand and Wolfgang Wimmer* IV-24

5. Wide-band Communication for Transmission Line Relaying
   – *H. Hupfauer and G. Koch* IV-34

SESSION V - TESTING OF RELAYS AND SCHEMES

1. Testing Numerical Relays - Alternative Techniques and a Laboratory Implementation
   – *M.S. Sachdev and T.S. Sidhu* V-1

2. Efficient Type Testing of Digital Protection Relays
   – *Steffen Kaiser and Reinhard Kuntner* V-7

3. Remote Controlled Testing of Communication Schemes for Power System Protection Using Satellite (GPS) Synchronization and Modern Communication Technology : A New Approach
   – *Zeljko Schreiner and Reinhard Kuntner* V-14

4. Modelling Relays for Use in Power System Protection Studies
   – *M.S. Sachdev and T.S. Sidhu* V-26

5. Experiences with Field Testing of Protective Relays
   – *P. Kaliappan, Vanishree Samuel, A. Amruthakala, V. Arunachalam and V.N. Nandakumar* V-32

SESSION VI - OVERALL POWER SYSTEM PROTECTION DISTURBANCE ANALYSIS AND FAULT LOCATION

1. Wide Area Protection Solution for Enhancing Power System Security and Performance
   – *Mehmet Kaba and Joachim Bertsch* VI-1

2. Absolute Phase in Power System Applications
   – *Bruce H. Roeder* VI-9

3. Fault Location on Parallel Transmission Lines with Series Compensation
   – *M.M. Saha, K. Wikström, J. Izykowski, E. Rosolowski* VI-20

4. A Scheme for Accurately Locating Transmission Line Faults Including the High Impedance Ones
   – *R.N. Mahanty and P.B. Dutta Gupta* VI-30

SESSION VII - LINE PROTECTION

1. A New Adaptive Distance Protection Scheme for Series Compensated Transmission Lines
   – *M.M. Saha, K. Wilkström, S. Lidström and B.S. Palki* VII-1

2. Implementation of an Adaptive Data Window Technique in a Distance Relay
   – *D.S. Ghotra, M.S. Sachdev and T.S. Sidhu* VII-11

3. Improving the Operation of 2-Zone Distance Relays Protecting HV/EHV Transmission Lines
   – *D. Sebastian-Baltaza, R. Mota-Palomino, T.S. Sidhu and M.S. Sachdev* VII-18

4. Numerical Relays–CESC's Experience and a Few Case Studies
   – *Sanjoy Mukherjee and Rajarsi Ray* VII-27

5. Limits to Conventional Distance Relaying in Series Compensated Transmission Lines - Case Studies
   – *V.K. Prasher, Vikas Saksena, P. Jayachandran and V. Thiyagarajan* VII-39

SESSION VIII - PROTECTION SCHEMES FOR TRANSFORMER BUSBAR AND TRACTION

1. Capabilities of Modern Numerical Differential Protections
   – *Z. Gajic and M. M. Saha* VIII-1

2. Digital Differential Protection for Transformers
   – *L.S. Karandikar and Pankaj Gupta* VIII-11

3. Numerical Busbar Protection Benefits of Numerical Technology in Electrical Substation
   – *E. Legrand and Mathew Koshy* VIII-20

4. A Busbar Protection Technique and its Performance during CT Saturation and CT Ratio-Mismatch
   – *H.S. Gill, M.S. Sachdev and T.S. Sidhu* VIII-24

5. New Developmental Trends of Protective Relays for 25 kV AC Electric Traction System of Indian Railways
   – *Vinod Kumar and Deepak Ganju* VIII-33

SESSION IX - POWER PLANT PROTECTION

1. Specific Protection Aspects of Combined Cycle Power Plants
   – *R.S. Chawla, K.K. Khurana, G. Subramanian and P.C. Tripathi* IX-1

2. Upgrading Generator Protection with Digital Multifunction Relay Technology
   – *Murty V.V.S. Yalla and George Punnoose* IX-7

3. Protection Experience of Generator Unit
   – *Bhim Rai and T.K. Saha* IX-18

4. Field Experience of Numeric Protection Relay for Generators
   – *K.V.H. Rao, V. Shyamala, T. Saikumar and B.N. Mohanty* IX-35

5. Detection and Location of Low-Level Arcing Faults in Metal-Clad Electrical Apparatus
   – *G.S. Sagoo, T.S. Sidhu and M.S. Sachdev* IX-42

6. Economical and Technical Advantages of a Modular Plug-in Relay System Considering the Needs for Retrofit in Modern Power Systems
   – *G. Stranne and M.M. Saha* IX-49

SESSION VII - LINE PROTECTION

1. A New Adaptive Distance Protection Scheme for Series Compensated Transmission Lines
   – *M.M. Saha, K. Wilkström, S. Lidström and B.S. Palki* VII-1

2. Implementation of an Adaptive Data Window Technique in a Distance Relay
   – *D.S. Ghotra, M.S. Sachdev and T.S. Sidhu* VII-11

3. Improving the Operation of 2-Zone Distance Relays Protecting HV/EHV Transmission Lines
   – *D. Sebastian-Baltaza, R. Mota-Palomino, T.S. Sidhu and M.S. Sachdev* VII-18

4. Numerical Relays–CESC's Experience and a Few Case Studies
   – *Sanjoy Mukherjee and Rajarsi Ray* VII-27

5. Limits to Conventional Distance Relaying in Series Compensated Transmission Lines - Case Studies
   – *V.K. Prasher, Vikas Saksena, P. Jayachandran and V. Thiyagarajan* VII-39

SESSION VIII - PROTECTION SCHEMES FOR TRANSFORMER BUSBAR AND TRACTION

1. Capabilities of Modern Numerical Differential Protections
   – *Z. Gajic and M. M. Saha* VIII-1

2. Digital Differential Protection for Transformers
   – *L.S. Karandikar and Pankaj Gupta* VIII-11

3. Numerical Busbar Protection Benefits of Numerical Technology in Electrical Substation
   – *E. Legrand and Mathew Koshy* VIII-20

4. A Busbar Protection Technique and its Performance during CT Saturation and CT Ratio-Mismatch
   – *H.S. Gill, M.S. Sachdev and T.S. Sidhu* VIII-24

5. New Developmental Trends of Protective Relays for 25 kV AC Electric Traction System of Indian Railways
   – *Vinod Kumar and Deepak Ganju* VIII-33

SESSION IX - POWER PLANT PROTECTION

1. Specific Protection Aspects of Combined Cycle Power Plants
   – *R.S. Chawla, K.K. Khurana, G. Subramanian and P.C. Tripathi* IX-1

2. Upgrading Generator Protection with Digital Multifunction Relay Technology
   – *Murty V.V.S. Yalla and George Punnoose* IX-7

3. Protection Experience of Generator Unit
   – *Bhim Rai and T.K. Saha* IX-18

4. Field Experience of Numeric Protection Relay for Generators
   – *K.V.H. Rao, V. Shyamala, T. Saikumar and B.N. Mohanty* IX-35

5. Detection and Location of Low-Level Arcing Faults in Metal-Clad Electrical Apparatus
   – *G.S. Sagoo, T.S. Sidhu and M.S. Sachdev* IX-42

6. Economical and Technical Advantages of a Modular Plug-in Relay System Considering the Needs for Retrofit in Modern Power Systems
   – *G. Stranne and M.M. Saha* IX-49

SESSION X - APPLICATION OF ARTIFICIAL INTELLIGENCE FOR PROTECTION

1. Artificial Intelligent Application and Wavelet Techniques to Power System Protection
   – *M. M. Saha, E. Rosolowski, J. Izykowski and P. Pierz* X-1

2. ANN Approach to Numerical Differential Protection and Condition Monitoring of Power Tranformer
   – *Z. Moravej and D.N. Vishwakarma* X-11

3. Two Novel Schemes Based on Wavelet Analysis and Artificial Neural Network for Detection and Classification of Transmission Line Faults
   – *R.N. Mahanty and P.B. Dutta Gupta* X-23

4. A Technique for Analyzing Artificial Neural Network Based Protective Relays
   – *L. Mital, T.S. Sidhu and M.S. Sachdev* X-30

5. Fuzzy Logic Based Protection for Three-Phase Transformers
   – *M. Geethanjali, S. Mary Raja Slochanal and Nilima Panda* X-36

SPONSORS' PROFILES 1-12
